

**A unique ingredient concentrated in Specialized Pro-Resolving Mediators that supports the body's natural capacity to resolve inflammation.**

Specialized Pro-Resolving Mediators (SPM's) are endogenous lipid mediators essential to promoting resolution of the inflammatory process and a return to homeostasis\*.

**FIGURE 1:**

SPM's do not block the inflammatory process, instead they promote the immune system's natural response\*.

**Lipinova™ is the only available ingredient concentrated in SPM's specifically designed to have pro-resolution activity.**

- Aids in the process of recovery from inflammation without compromising host defenses or suppressing the immune response
- Validated in various models (in vitro and in vivo)
- Unique and IP protected<sup>1</sup>
- Non-GMO and gluten-free
- Shelf life: 24 months

**Supplementation with SPM's improves the body's natural capacity to resolve inflammation which may be compromised by:**

- Preexisting health conditions\*
- Harmful environmental factors and aging\*

**Recent study results of dietary supplementation with Lipinova™ given to subjects with chronic inflammatory conditions determined<sup>2</sup>:**

**Reduction of inflammatory biomarkers**

- 43% reduction in high-sensitivity C-reactive protein (hs-CRP) with concurrent reduction in prostaglandin E<sub>2</sub> (PGE<sub>2</sub>) at 4 weeks
- hs-CRP remained reduced, and PGE<sub>2</sub> was reduced to normal range, at 8 weeks

**Significant improvement in clinical symptomatology:**

- 50% reduction on the BPI (Brief Pain Inventory) total score
- The magnitude of pain was reduced in the total group

**FIGURE 2: BPI total scores from baseline to 8 weeks**  
\*statistically significant from baseline (p<0.001).

- ✓ SPM's decrease production of pro-inflammatory mediators and thus reduce swelling and pain
- ✓ SPM's may improve patients quality of life
