**Re: Together against COVID-19: a reassuring message**

Dear customer/collaborator:

As these last days we are facing an unprecedented and extremely difficult situation for all of us derived from the sanitary crisis originated by COVID-19, I consider convenient to provide you with an update of the measures SOLUTEX GROUP has taken to continue with our daily operative as always, as our primary concern in the current situation is the well-being of our team and families as well as our ability to continue serving our products to our valued customers with the same quality standards.

In addition to fulfilling any and all the strict rules and regulations implemented by the Spanish Government, since last week our companies have implemented a work plan to preserve the health of our staff, allowing them, in some case, to remote working from their homes, allowing our team will to serve and stay in contact with you by the normal means, guaranteeing adequate service to our clients and collaborators. In other cases, as at our production site, we have extended the clean zone hygiene rules. Let us inform you that to present our production facility in Mallén (Zaragoza) is running at its normal pace.

Additionally, SOLUTEX GROUP has implemented other complementary measures, as:

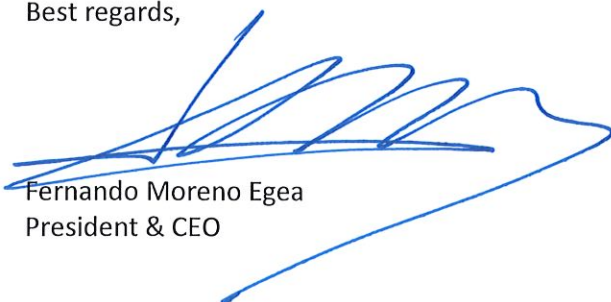

- Not allowing visitors to any of our offices and/or our production site, until further notice.
- Banning travels for any member of our companies.
- Regarding materials supply, our suppliers have increased the safety stock of critical raw materials.
- Regarding logistics, our business partners confirm that supply chains are operating as usual.

Likewise, we have implemented business contingency measures and monitoring protocols to keep us updated and we are in constant contact with Spanish sanitary authorities.

Our team will stay to your disposal in case of questions or comments such that we can provide you with any update you might need at this point in time.

In this extraordinary circumstances, all of us would like to wish you the best for you and your family.

Best regards,

Fernando Moreno Egea  
President & CEO
